# Trend Line 35 carbon poles

Baudoin Ocean Wash-Systems b.v. develops efficient, ergonomic carbon wash poles, brushes and accessories. The Trend Line 35 poles are proven, solid carbon washing poles, which are easy to connect due to the simple connection. The drop shape of the Trend Line 35 pole offers an excellent grip. The poles have a diameter of 35 mm and length of 150 cm and weighs only 335 gram. They can be used up to a height of approx. 10 meters. The 9 meter set is more than sufficient for washing boat hulls and glazing. When using the Trend Line 35 pole, you only lift the weight of the poles you need at that moment in length, unlike the telescopic poles where you always lift the entire weight of the pole. The unique adapter for the Trend Line 35 pole makes it possible to use both Baudoin and Shurhold® brushes and accessories on the pole.
